

Outsource the Framing

You are now half-way done.

1 Drawings

If you have sketches, we can turn them into a permit-

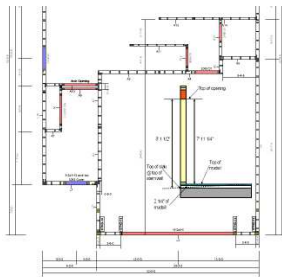

Includes Structural Engineering

ready full set of construction drawings. There is no need for you to hire an architect, and remember, NEVER buy a full set off the Internet!

2 Foundation

Shear and seismic hardware locations are specifically drawn using our MiTek Foundation Layout unlike regular plans.

If the project location is near SHME headquarters, SHME may be able to take on the foundation for your convenience.

ready full set of construction drawings. There is no need for you to hire an architect, and

3 State-of-the-Art Construction

Accurate to within 1/16", our state-of-the-art laser saw optimizes lumber usage while reducing material handling and minimizing scrap to help save the environment.

4 Installation

Once the foundation is completed, SHME will then bring the Framing System with a crane truck. Our experienced installation crew can

typically install the system up to the roof

sheathing in 5 to 10 days depending on the size and complexity of the project.

5 Consultation

After the roof sheathing is nailed off, SHME provides 5 hours of free consultation for the remainder of construction.

Some of the Benefits

- No more headaches during the building permit process.
- 10-year structural warranty
- Hard cost on framing
- 5 times faster than conventional onsite framing
- 100% disbursement on framing draw in 20 days
- Prevents theft of framing materials
- No additional tickets from lumber yards
- And much, much more!!

Custom Homes, Multi-Family, Commercial Buildings, Remote Areas and Overseas Projects: SHME enables you to build a variety of projects!
